

local.connection.TcpConnection.encrypt
_and_send_msg

local.connection.TcpConnection.read
_local_tcp_socket

local.connection.TcpConnection.socket

```
graph LR; A[local.connection.TcpConnection.encrypt_and_send_msg] --> C[local.connection.TcpConnection.socket]; B[local.connection.TcpConnection.read_local_tcp_socket] --> C;
```

The diagram illustrates a dependency or data flow. On the left, there are two rectangular boxes. The top box contains the text 'local.connection.TcpConnection.encrypt_and_send_msg'. The bottom box contains the text 'local.connection.TcpConnection.read_local_tcp_socket'. On the right, there is a single rectangular box with a light gray fill and a black border, containing the text 'local.connection.TcpConnection.socket'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the right box, indicating that both functions on the left depend on or interact with the 'socket' attribute on the right.
